EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Rodgers on 01/24/2005.

The application has been amended as follows:

In claim 1, after "probiotic and prebiotic" and before "." add:

with the proviso that the prebiotic is not agar"

In claims 5, 53, and 55, line 2, after chitin delete: , agar

The following is an examiner's statement of reasons for allowance: The closest prior art is that of Reid et al which discloses the combination of either lactobacilli or bifidobacteria (probiotics) with agar. The intended use of the Reid et al patent has no bearing on patentability of the composition. Agar can be considered a prebiotic, but it is not a mucopolysaccharide. Further, the specification does not seem to contemplate the use of agar. However, since it may be considered a prebiotic, the proviso was added to

claim 1 so that the Reid et al reference will no longer read on the composition of the instant claims. Method claim 23 is allowable since the Reid et al reference does not contemplate the use of an enteral feeding tube.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
